DDS238-4（B） single phase din rail type watt hour meter (D1401)

The meter is designed to measure single phase two wire AC active energy like residential, utility and industrial application. It is a long life meter with the advantage of high stability, high over load capability, low power loss and small volume.

Basic Function

★LCD display 6+1(default) or 5+2

★Bi-directional total active energy measurement ,reverse active energy measure in the total active energy

★ Pulse LED indicates working of meter, Passive pulse output with optical coupling isolation

★Energy data can store in memory chip more than 15 years after power off

★35mm din rail installation
