DDS238-S single phase solar system measure watt hour meter (E1206)

The meter is designed to measure single phase two wire AC active energy for solar system. It adopt LSI and SMT technology, the key component are long life international brand product. All of its functions comply with the relative technical requirement for class 1 single phase watt hour meter in IEC62053-21. It is a long life meter with the advantage of high stability, high over load capability, low power loss and compact size.

#### **Basic Function**

- ★ Bi-directional active energy measurement, reverse active energy measure display F99999.9 kWh, normal active energy display 999999.9 kWh
- ★Pulse LED indicates working of meter, Pulse output with optical coupling isolation
- ★Two type of cases(protective-class I and II) are available

#### **Optional Function**

- ★Battery for display when power off
- ★Ultrasonic weld sealing between meter cover and meter base, not used screw

Noting : other voltage, current are also available. Other function also can be special design as customer requirement
